1.103.pdf.part2Two non-electrolytes cause different changes in the response of Ca^{2+} ions in sarcoplasmic reticulum to caffeine in the presence of ATP. The effects of two non-electrolytes, Gd^{3+} , and diiodomethylsulfate (DIMS), on the response of Ca^{2+} ions in sarcoplasmic reticulum to caffeine in the presence of ATP were studied. In the presence of ATP and both Gd^{3+} and DIMS, a 40 mM caffeine-induced Ca^{2+} release from the Ca^{2+} -loaded sarcoplasmic reticulum was not observed. However, when the Ca^{2+} -ATPase activity was inhibited by 1 microM ouabain, the caffeine-induced Ca^{2+} release was significantly depressed by approximately 50% with 10 mM DIMS, and almost completely inhibited by 60 mM Gd^{3+} . Caffeine may cause Ca^{2+} release from the sarcoplasmic reticulum by a mechanism dependent on the Ca^{2+} -ATPase activity. However, the depression of caffeine-induced Ca^{2+} release by DIMS was due to the inhibition of Ca^{2+} -ATPase activity, while Gd^{3+} may have been ineffective.

Q: Paginate a Vue.js component loaded in a modal dialog I'm using Vuetify.js as UI library for a component loaded in a modal dialog. I can't figure out how to paginate the list of items. `{{ $('pages.components.test') }} {{ $('pages.components.test.list') }}` f3e1b3768c
