

Useful Tips for Interior Decor with Plants

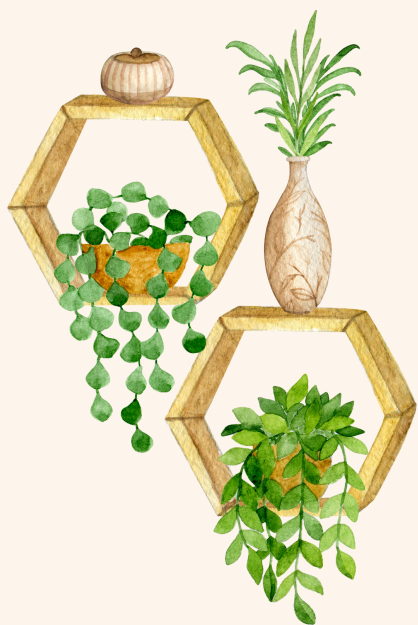

Start Placing Simple

Start by placing a few easy-to-grow plants. Take time to learn and observe how to take care of them.

Use a Bar Cart

Use an empty bar cart to make a plant stand. You can move the plants when they need to be exposed to the sun. Move them away if your plants receive too much sunlight.

Try Vines

Consider trying vines to decorate your home. Shape your vines and wrap them around a mirror. Avoid the dangling leaves off the floor to make them tidier.

Decorate Every Corner

Turn every corner of your home by placing the plants. You can choose a variety of small plants in different sizes of pots.

Play with Planters

Try new things with planters. You can hang, mount, or put the plants near the window. Before styling them, make sure the plants can thrive.
